Netsuite Developer | Web & Software Development
Sta. Mesa Manila | +639761092221 | andrewgragasin3@gmail.com

Dynamic NetSuite & Software Developer with 6 years of experience specializing in ERP solutions and software development. Proven track record of helping enterprise companies accelerate digital transformation by optimizing and modernizing their systems. Skilled in managing NetSuite instances, user administration, and process automation. Successfully delivered numerous customizations—including vendor bill automation—using SuiteScripts, workflows, advanced PDFs, and third-party integration tools to drive efficiency and scalability.

AREAS OF EXPERTISE

- Netsuite - SuiteScript 2.1
- System Integration (REST, SOAP, etc.)
- PHP / Laravel 10 / WordPress (Theme / Plugins) Development
- REST API development
- HTML, CSS, Javascript (ES6)
- jQuery, ReactJS
- MySQL, SQL
- Basic DevOps (cPanel, SSH, AWS, Heroku)
- Project Management
- Version Control: Git, Bit Bucket, Gitlab

PROFESSIONAL EXPERIENCE

Christian Generosity Foundation

Netsuite Developer

Pasay City

May 6, 2024 - Present

- **NetSuite Development & Customization** – Designed and developed custom features within NetSuite, leveraging SuiteScripts, workflows, and saved searches to address complex business requirements.
- **System Integration** – Integrated NetSuite with a custom Java-based portal to support donor contribution management, grants, foreign exchange processing, and other critical business functions.
- **NetSuite Administration** – Managed user access, roles, permissions, and system maintenance to ensure security, stability, and optimal performance.
- **Agile Development (SCRUM)** – Served as a developer within a SCRUM team, actively participating in sprint planning, grooming sessions, and retrospectives. Contributed to identifying enhancements and successfully delivering product increments within sprint cycles.

IT Group Inc. - Quezon Avenue

Software Developer

Quezon City

Nov. 28, 2022 - April 30, 2024

- **NetSuite Development & Customization** – Designed and developed custom features within NetSuite, leveraging SuiteScripts, workflows, and advanced PDFs to address complex business requirements.

Spearhead implementation and development of customizations using SuiteScript 2.1 to tailor solutions to client requirements.

- **System Integration** – Integrated NetSuite with various web applications, e-commerce platforms, and POS systems to enable seamless data flow and operational efficiency. Seamlessly integrate third-party applications using REST, SOAP, and other relevant protocols for efficient data migration and real-time data synchronization.
- **NetSuite Administration** – Managed user access, roles, permissions, and system maintenance to ensure security, stability, and optimal performance. Assume responsibility for managing clients' NetSuite accounts, overseeing administrative tasks to ensure smooth operations.
- **Client Implementation & Consulting** – Served as a resource developer for NetSuite implementations across diverse industries, including fashion jewelry, e-commerce, watch retail, and BPO.
- **Stakeholder Collaboration** – Partnered with end-users and management to gather requirements, solicit feedback, and deliver tailored solutions that align with business objectives.
- **Key Project Deliverables** – Successfully delivered high-impact projects, including:
 - Barcoding solutions
 - Customized fixed asset management
 - E-commerce and POS system integrations
 - Customized financial reports

Trainings:

- SuiteScript 2.0 Extend Netsuite with JavaScript
- Advance PDF/HTML Templates: Customizing Printouts and emails
- Netsuite ERP fundamentals

DICE 205 Digital Corporations

Jr. Software Developer

Mandaluyong City

10/28/2019 - 09/05/2022

- **Web Application Development & Full-Stack Solutions** – Led the design and development of scalable web applications for top clients, utilizing PHP, Laravel, and custom WordPress themes. Delivered complex reporting solutions using Laravel and MySQL, and implemented features such as QR code generation for marketing initiatives. Also built a custom WordPress theme for a university website.
- **Agile Leadership & Collaboration** – Participated in sprint planning to align on client requirements, propose solutions, and establish timelines. Contributed to team-lead meetings to support strategic growth initiatives.
- **Mentorship & Team Development** – Conducted one-on-one sessions and trained interns in Laravel, WordPress, and related technologies to build technical competency and support professional growth.
